Starting

WIS4communities is a SaaS Renewable Energy Communities (REC) management platform that addresses all needs of a REC manager and its participants.

Developed with contributions from the **ENPOWER** and **U2DEMO** projects **WIS4Communities** is a cloud-based, SW as a Service (SaaS) platform to cover all REC manager needs in the management and optimization of multiple RECs.

- Key features:**
- Establishment of internal energy markets with different remuneration methods
 - Application of optimal Dynamic Sharing coefficients
 - Incorporation of Demand Response layer to control flexible assets (under development with contributions from PVSmile and AIDEN)
